## **DETAILED ACTION**

Claims 1-4, 6, and 13-21 are currently pending in the instant application and are subject to the following new lack of unity requirement. Claims 5 and 7-12 are canceled by preliminary amendment.

## Election/Restrictions

Restriction is required under 35 U.S.C. 372.

## Lack of Unity Requirement

Claims 1-4, 6, and 13-21 are drawn to more than one inventive concept (as defined by PCT Rule 13), and accordingly, a restriction is required according to the provision of PCT Rule 13.2

PCT Rule 13.2 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a general inventive concept (requirement of unity of invention).

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Annex B, Part 1(b), provides that "special technical features" mean those technical features, which, as a whole, define a contribution over the prior art.

Annex B, Part 1(e), provides combinations of different categories of claims and states:

"The method for determining unity of invention under Rule 13 shall be construed as permitting, in particular, the inclusion of any one of the following combinations of claims of different categories in the same international application:

(i) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for a use of the said product, or

Application/Control Number: 10/521,727

Page 3

Art Unit: 1626

(ii) in addition to an independent claim for a given process, an independent claim for an apparatus or means specifically designed for carrying out the said process, or

(iii) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for an apparatus or means specifically designed for carrying out the said process,..."

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted. The following groups are exemplary:

Group I: Claims 1-4 and 6 drawn to a compound of formula (I),

, wherein U is S; T, W, and M are C; Y is CN; V is S; R1, R3, R4,

**R5**, **R6**, **R7** and **R8** are hydrogen; and **R2** is phenyl, yielding the compound of Example 1 of page 17 of the specification, 3-[[(1R,3S)-3-amino-4-hydroxy-1-phenylbutyl]thio]-2-

Application/Control Number: 10/521,727

Page 4

Art Unit: 1626

Group II: Claims 1-4 and 6 drawn to a compound of formula (I),

, wherein U, T, W, and M are C; Y is CH3; V is NR7; R1, R3, R4,

R5, R6, R7 and R8 are hydrogen; and R2 is methyl.

Group III: Claims 1-4 and 6 drawn to a compound of formula (I),

$$\begin{array}{c|c}
 & R^5 & O \\
 & R^4 \\
 & R^6 \\
 & R^3
\end{array}$$

, wherein U is N; T, W, and M are C; Y is CH3; V is NR7; R1, R3,

R4, R5, R6, R7 and R8 are hydrogen; and R2 is methyl.

Group IV: Claims 1-4 and 6 drawn to a compound of formula (I),

, wherein U is O; T, W, and M are C; Y is CH3; V is NR7; R1, R3,

R4, R5, R6, R7 and R8 are hydrogen; and R2 is methyl.

Group V: Claims 1-4 and 6 drawn to a compound of formula (I),

, wherein U is SO; T, W, and M are C; Y is CH3; V is NR7; R1, R3,

R4, R5, R6, R7 and R8 are hydrogen; and R2 is methyl.

Group VI: Claims 1-4 and 6 drawn to a compound of formula (I),

, wherein U is SO2; T, W, and M are C; Y is CH3; V is NR7; R1, R3,

R4, R5, R6, R7 and R8 are hydrogen; and R2 is methyl.

Group VII: Claims 13-16 and 18-21 drawn to a method of using the compound of formula (I), wherein the disorder to be treated is pain.

Group VIII: Claim 17 drawn to a process for the preparation of a compound of formula (I).

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: they do not share the same essential structural element(s) that define the "special technical feature" necessary to specify a contribution over the prior art.

There is no significant structural moiety common to Groups I-VIII, which is not known in the art and would make a contribution over the prior art. Note that the compound of formula (I) contains numerous variables making a core structure difficult to ascertain. If an attempt at a core structure were to made, it would consist of an alkyl chain substituted with a nitrogen, oxygen, and cyclic moiety. This is well known in the art. (See Nishi et al., U.S. Pat. No.

$$\mathbb{R}^{4} \xrightarrow{N\mathbb{R}^{1}\mathbb{R}^{2}} (CH_{2})_{2} \xrightarrow{\mathbb{R}^{5}} \mathbb{R}^{7} \times -Y - \mathbb{R}^{5}$$

6,723,745, wherein the compound of formula (I),

, consists

of the alkyl chain, substituted with a nitrogen, oxygen and cyclic moiety. In addition, there are numerous substituents and various combinations that could be made from the generic compound of formula (I). Also, the various process claims all require different reactants and/or reagents and/or reaction conditions and/or products. Thus, these claims lack the corresponding special technical feature(s) necessary to link them together to fulfill the lack of unity invention requirement.

Therefore since the claims are drawn to more than a product and more than a process, the claims lack unity of invention and should be limited to only one product and one process of making that product.

A telephone call was made to Attorney Robert Nabinger on 08/20/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

## Telephone Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susannah Chung whose telephone number is (571) 272-6098. The examiner can normally be reached on M-F, 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph McKane can be reached on (571) 272-0699. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
